-- EXPERIENCE --

Independent Contractor

2016 - present

Web Development:

- Created CMS and custom static website generators including a client-facing update interface built with Django (live site).
- Nginx server hosting and maintenance.
- Front-end web development for Spring Boot web app (live site).
- Discourse setup and customization.

Scripting & Automation:

- Excel & Google Suite scripts to automate inventory maintenance for GPU rig construction.
- PDF form creation for financial contract company.
- Computer Art projects with Python and OpenCV (e.g. the moon package)

Android Development:

- Flora Tracker application for non-profit organization Plants of Concern.

General:

- Collaborated closely with clients to better understand project scopes.
- Performed work according to project schedules and high-quality standards.
- Set and revised production schedules to meet changing demands.

IRi (Chicago, IL) — *Lead Data Analyst (II)*

2016 - 2017

Managed a team of local and remote analysts for monthly updates of retail client custom data. Wrote and maintained Excel VBA macros and applications for team use. Managed technical support regarding internal tools to a team of 50 analysts via email and chat. Resolved issues and triaged unresolved issues to appropriate departments.

GrubHub (Chicago, IL) — *Restaurant Support Associate*

2015 - 2016

Provided tech support for restaurant client OrderHub hardware and software updates. Provided training and support for new hires. Set up and maintained payment cycles for restaurant clients, handled inbound restaurant inquiries, beta testing for internal tools and software updates. Exceeded average resolution metrics and consistently exceeded quality expectations.
